Champagne Toast (Constantine Dam)

8/4/04

ARI #1176278

Medium Fawn

dam: Burgundy

ARI # 111130

sire: Mateo S228

ARI # 800264

This little beauty is the daughter of our Burgundy (an 18-year-old, Chilean import who has produced numerous ribbon winners) and Mateo who is a Pluro son. Champagne has a soft, crimped fleece that earned her many ribbons during her show career. Champagne's first cria, sired by our Chimera, is a beautiful white male (Constantine) with an amazingly bright fleece. In fact his fleece won the Best Brightness

Carina's Chimera (Constantine Sire)

9/17/2002

ARI 841527

White

dam: P. Carina

ARI # 800060

sire: Peruvian Dakotia

ARI # 174341

This full Peruvian grandson of Bueno, son of Dakotia and our Peruvian Carina possesses incredible density, crimp and handle. Chimera has done well in the showing at large shows in the extremely competitive white class. His confirmation earned him a first place ribbon the only time he was shown in the shorn class. Chimera's 4 year old fleece is absolutely breathtaking!!!! It has incredible crimp and luster, fineness and staple length for a male this age. Chimera's crias are white and fawn and all of them have an amazing brightness to their fleeces. His first cria's (Constantine) fleece won the Best Brightness award at a fleece show with 132 entries. When the last cria was born, the owner called to tell me the fleece is so bright it looks like a suri!!!! This is a characteristic he has been consistently passing along to his crias.
